

632/672 SERIES SMART SERIES WATER DISPENSER

ACUO
we care about the water you drink

W320 x D450 x H1250 (mm)
Depth includes Drip Tray

W320 x D480 x H520 (mm)
Depth includes Drip Tray

ELEGANT & SMART

Maximum efficiency
Available in Floor-Standing and Counter-Top

SMART

Micro-Computerized
Boiling Sterilization
Temp. Preservation
Energy Conservation
Re-Boil Function
Continuous Dispense
LED Display

Smarter control, better functions.
All water boiled before dispensed.
Allows setting of 98, 95, 90, 80, 70°C.
Allows setting of Sleep-Mode up to 60hrs.
Constant supply of boiled water.
Designed for large volume usage.
Displays status of water dispenser.

SAFE

Water Quality Test
Hot Water Lock
Protection System

Obtain TDS value anytime (RO Model).
Avoid scalding accidents.
Automatically suspends power and water
supply when product malfunctions or leaks.

SLENDER

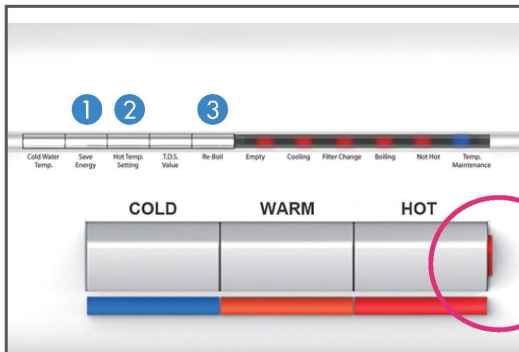

Elegant silhouette
Easy-Open Filter Space
Wide Drip Tray
Advance Material

Suitable for offices and homes.
Change filter tools-free.
Convenient for larger containers.
ABS plastic steel + Laminated Colour Metal,
withstand erosion, abrasion, acidity
and alkaline. Easy to maintain!

DISPLAY & CONTROL PANEL

- ① Energy Saving**
Allows setting of Sleep-Mode up to 60hrs!
- ② Hot Temp. Setting**
Hot water temperature preservation can be set at 98°C, 95°C, 90°C, 80°C or 70°C.
- ③ Re-Boil Function**
Constant supply of boiled water
- ④ Hot Water Lock**
Prevents Scalding accidents.

BUILT-IN FILTRATION SYSTEM

UF-10P5C DUAL-PURPOSE Super-Refined Activated Carbon Filter

**2-in-1 Structure
PP + Activated Carbon**

Step One:
5 micron PP Filter
Effectively filters out mud, sand, rust and other particles and sediments.

Step Two:
Activated Carbon Filter
Removes color, odor and extracts chemicals such as chloride, pesticides and heavy metals from the water.

UF-504
60G R.O. Membrane

0.0001 micron filters out virus, germs, toxics and heavy metals such as mercury, cadmium... etc, providing clean and safe drinking water.

UF-21 Disposable Post Activated Carbon Filter

For the final polishing of water in Reverse Osmosis systems, to remove unpleasant taste and odors from the water stored in tank, to produce cleaner, clearer, better tasting water.
